

# E-COMPONENTS

## High-Frequency Ferrite Transformers Engineered for Performance

E-Components is an ISO 9001:2015 certified manufacturer specializing in high-quality transformers and electromagnetic components for industrial and electronic applications. With 9+ years of experience, the company has built a strong reputation for delivering reliable, precision-engineered solutions tailored to customer requirements. Backed by a skilled technical team, advanced manufacturing facility, strict quality

# About Us

Equipped with advanced manufacturing infrastructure, modern testing facilities, and efficient bulk production capabilities, E-Components has established itself as a trusted manufacturer of high-quality electronic and magnetic components for a wide range of industries. The company specializes in products such as ferrite transformers, current transformers, common mode choke inductors, and customized magnetic solutions designed to meet diverse industrial requirements. With a strong focus on innovation, precision engineering, product reliability, and consistent performance, E-Components ensures that every product meets strict quality standards before delivery. The company is also committed to maintaining timely delivery schedules, dependable manufacturing processes, and long-term customer relationships through continuous improvement, technical expertise, and customer-focused service.

# Our Company Services

01 Custom Transformer Manufacturing

02 Advanced Quality Testing

03 Bulk Production Capability

04 On-Time Delivery Support

05 Customized Wound Components

06 Ferrite Transformer Manufacturing

# Why Choose Us?

Committed to Delivering the Highest Quality  
Services for Your Business Needs

## Proven Experience

Years of delivering quality work across diverse projects with consistent client satisfaction.

## Dedicated Team

Skilled professionals working together to provide the best results for every requirement.

## On-Time Delivery

Projects completed within deadlines with careful planning and efficient execution always.

# Our Mission

At E-Components, our mission is to power innovation through high-performance magnetic solutions designed for today's evolving electronics industry. We focus on delivering transformers and magnetic components that combine efficiency, durability, and precision engineering.

We believe strong technology starts with strong partnerships. That's why we work closely with every client to understand their exact requirements and deliver reliable solutions that support long-term growth, performance, and trust.

With a commitment to quality, consistency, and continuous improvement, we aim to become a dependable global partner for advanced power electronics applications.

# CERTIFICATIONS COMPLIANCE

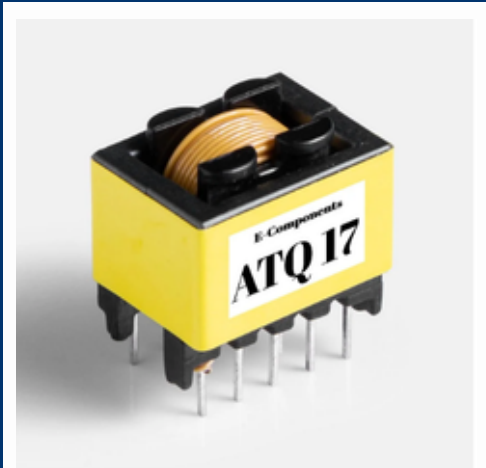

3

E-Components follows globally recognized manufacturing and quality standards to ensure every product meets industry expectations for performance, reliability, and safety.

Our processes are aligned with ISO 9001:2015 quality management standards, helping us maintain strict control across design, production, and testing stages. We are committed to delivering products that support international compliance requirements and customer confidence.

All components are manufactured in accordance with RoHS and REACH compliance standards, ensuring environmentally responsible production and suitability for global markets. Through continuous monitoring and quality assurance, we maintain high standards across every stage of manufacturing.
